Smaller Smarter Safer

- Advanced Electronics Design
- Lighter and Smaller Size
- Powerful Heavy Duty Battery
- Sensor, Film, PSP Compatible
- Active Dose Control
- Very Low Leakage Radiation
- 0.4mm Focal Spot

*The re-engineered **ALERIO** portable x-ray comes with improved ergonomics, functions and safety. Double shield technology, lead lined cone with scatter shield and a new exposure algorithm ensure best protection for the user and patient. High quality images are possible due to active dose control and the fine focal point. The convenience of portability and superior imaging is now available with local sales and support.*
